Problems and Implementation of Industrial College Construction Under the Deep Integration of Industry and Education

NIE Xiaomei¹ QU Yongpeng² YI Feng¹ LIU Chuanqin³

1. Jiangsu University of Technology Changzhou Jiangsu 213001 China

2. Changzhou University Changzhou Jiangsu 213164

3. Mudanjiang Normal University Mudanjiang Heilongjiang 157011 China

Abstract Deepening the integration of industry and education and promoting the coordinated development of talents industry and innovation are the requirements and trends of talent training. The joint construction of industrial colleges by colleges and enterprises provides a new path for the cultivation of sports talents in local colleges and universities. According to the needs of enterprises and the real situation of the college the paper puts forward the goal of multi-level talent cultivation based on the regional roots and demands full coverage multi-channel talent sources innovative training plan the exploration of validated multi-stage practice mode of "theory-practice-theory-practice". The reform of sports talents training in colleges and universities is promoted by several ways such as creating an interactive curriculum system between colleges and enterprises building a "1+1" double platform for practice and training and enhancing the ability of collaborative education.

Four Dimensions and Methods of Integrating the Great Anti-epidemic Spirit into the Course of Basic Principles of Marxism

WANG Ting XU Jingwen LIU Yao JI Huiping

Beijing City University Beijing 100083 China

Abstract The great spirit of fighting COVID-19 forged in the process of life-and-death and tenacious struggle against the epidemic is a strong spiritual support for winning the battle against the epidemic. People and life are its values patriotism and collectivism are its driving core comprehensive dialectic and integrated system are its logic and truth-seeking and pragmatic pioneering and innovative are its practical guidance. In the teaching process of the course of The Basic Principles of Marxism the four important dimensions should be grasped and the comparative education method typical education method guidance education method and infection education method should be properly used in the specific teaching process to integrate the anti-epidemic spirit into the students' world outlook the outlook on life values education and guidance enabling the students further strengthen the "four self-confidences" and consciously work hard to build socialism with Chinese characteristics and realize the Chinese dream of the great rejuvenation the Chinese nation.
