A Visual Analysis of Public Cultural Services Research Based on Bibliometrics

WANG Ruiwen ZOU Xinru

Tianjin University of Commerce Tianjin 300134 China

Abstract Since the Fifth Plenary Session of the 16th CPC Central Committee China has vigorously promoted the construction of public cultural service system and public cultural service has become the focus of theoretical research. This paper takes 794 research literatures related to public cultural service collected from CSSCI 2005 to 2020 as data sources and analyzes the literature distribution of public cultural service research in terms of time publications and periodicals scientific research institutions keywords and other aspects through COOC software so as to reveal the subject context and hot issues of public cultural service research. It is expected to provide reference for the theoretical research and practical development of public cultural services and put forward the future research prospects.
